THE COMPARISON

HUBBELL LEGACY DEVICES VS. EDGECONNECT™ DEVICES

Feature	Legacy Hubbell Devices	EdgeConnect™ Devices
Termination Method	Screw-based	Screwless spring terminals
Installation Time	Slower, requires tools and torqueing	Up to 80% faster – as quick as 11 seconds per termination
Tools Required	Screwdriver, torque tools	No tools needed – just insert wire and press lever
Wire Retention	Meets CSA standards	2× better retention than CSA requirements
Vibration Resistance	May loosen over time	25–60% better under vibration and temperature cycling
Safety	Exposed screw terminals	No exposed screws – safer for installers
Ease of Use	Manual, error-prone	Color-coded levers for foolproof wiring
Maintenance	Time-consuming	Quick disconnect and re-termination
